1. Technical information

Ferrite pot magnet Ø 40 mm with internal thread, holds approx. 9,1 kg, thread M4

Article ID	ITF-40
EAN	7640155432696
Material	Ferrite
Strength	approx. 9,1 kg (approx. 89,2 N)
Displacement force	approx. 1,8 kg (approx. 17,8 N)
Colour	Silver-coloured
Pot diameter D	40 mm
Pot height H	8 mm
Thread size	M4
Magnetisation	HF 24/23
Coating	Zinc (Zn)
Max. working temperature	200 °C
Tolerance	+/- 0,4 mm
Steel	DC01 (Germany)
Thread Steel type	11SMn30
Made in	Germany
Design	With internal thread
Shape	Disc
Weight	53,0000 g

Product compliant with the latest European RoHS directive.

Product compliant with the latest European REACH regulation.

2. Safety tips

<p>Danger</p> 	<p>Swallowing</p>
	<p>Children could swallow small magnets.</p>
	<p>If several magnets are swallowed, they could get stuck in the intestine and cause perilous complications.</p> <p>Magnets are not toys! Make sure that children don't play with magnets.</p>

Warning	Pacemaker
	<p>Magnets could affect the functioning of pacemakers and implanted heart defibrillators.</p> <ul style="list-style-type: none"> • A pacemaker could switch into test mode and cause illness. • A heart defibrillator may stop working. <p>• If you wear these devices keep sufficient distance to magnets: www.supermagnete.ee/eng/faq/distance</p> <ul style="list-style-type: none"> • Warn others who wear these devices from getting too close to magnets.

Warning	Heavy objects
	<p>Too heavy loads, symptoms of fatigue as well as material defect could cause a magnet or magnetic hook to loosen from the surface that it was attached to.</p> <p>Falling objects could lead to serious injuries.</p> <ul style="list-style-type: none"> • The indicated adhesive force applies only to ideal conditions. Allow for a high safety cushion. • Don't use magnets in places where people could sustain injuries in case of material failure.

3. Handling and storing

Caution	Magnetic field
	<p>Magnets produce a far-reaching, strong magnetic field. They could damage TVs and laptops, computer hard drives, credit and ATM cards, data storage media, mechanical watches, hearing aids and speakers.</p> <ul style="list-style-type: none"> • Keep magnets away from devices and objects that could be damaged by strong magnetic fields. • Please refer to our table of recommended distances: www.supermagnete.ee/eng/faq/distance

Notice	Influence on people
	<p>According to the current level of knowledge, magnetic fields of permanent magnets do not have a measurable positive or negative influence on people. It is unlikely that permanent magnets constitute a health risk, but it cannot be ruled out entirely.</p> <ul style="list-style-type: none"> • For your own safety, avoid constant contact with magnets. • Store large magnets at least one metre away from your body.

Notice	Temperature resistance
	<p>Ferrite magnets can be used at temperatures between -40°C and 250°C.</p> <p>At lower and higher temperatures they lose part of their adhesive force permanently.</p> <p>Don't use ferrite magnets in places where they are exposed to temperatures below -40°C or above 250°C.</p>

Notice	Mechanical treatment
	<p>Ferrite magnets are brittle.</p> <p>When drilling or sawing a magnet with improper tools, the magnet may break.</p> <p>Stay away from mechanical treatment of magnets if you do not possess the necessary equipment and experience.</p>

4. Transportation tips

Caution	Airfreight
	<p>Magnetic fields of improperly packaged magnets could influence airplane navigation devices. In the worst case it could lead to an accident.</p> <ul style="list-style-type: none"> • Airfreight magnets only in packaging with sufficient magnetic shielding. • Please refer to the respective regulations: www.supermagnete.ee/eng/faq/airfreight

<p>Caution</p> 	<p>Postage</p> <p>Magnetic fields of improperly packaged magnets could cause disturbances in sorting machines and damage fragile goods in other packages.</p> <ul style="list-style-type: none">• Please refer to our shipping tips: www.supermagnete.ee/eng/faq/shipping• Use a large box and place the magnet in the middle surrounded by lots of padding material.• Arrange magnets in a package in a way that the magnetic fields neutralise each other.• If necessary, use sheet iron to shield the magnetic field.• There are stricter rules for airfreight: Refer to the warning notice "Airfreight".
